## HOMEOWNERS

### HVAC HEALTH CHECKLIST

---

Here are some helpful questions you can ask yourself if you think your HVAC unit is not cooling or heating properly. However, we always recommend calling a Austex Air professional technicians to help.

- Have I changed my air filters?
- Is my outdoor unit clean of leaves?
- Do I have furniture blocking my ventilation vent?
- Are there rodents ruining my insulation duct work?
- is it time to update my thermostat?
- Is there at least two feet of clearance around the outdoor unit?
- is my HVAC system older than 10 years?
- Has my HVAC been serviced within 6 months?
- Do I have a Preventative Maintenance contract?
